

## INDEX TO VOLUME 119

## Alphabetical Table of Contents of Authors

- ABRAMS, PETER A., and TABER D. ALLISON. Complexity, stability, and functional response, 240
- ALLISON, TABER D. See PETER A. ABRAMS
- ANDERSEN, DOUGLAS C. Belowground herbivory: the adaptive geometry of geomyid burrows, 18
- AYAL, YORAM, and URIEL N. SAFRIEL. *r*-curves and the cost of the planktonic stage, 391
- BARNARD, DEBRA E. See ROBERT G. JAEGER
- BAWA, K. S. Outcrossing and the incidence of dioecism on island floras, 866
- BENDER, EDWARD A. See MICHAEL E. GILPIN
- BERTIN, ROBERT I. Paternity and fruit production in trumpet creeper (*Campsis radicans*), 694
- BIEHL, CARL C. See S. JOSEPH WRIGHT
- BONNER, J. T. Evolutionary strategies and developmental constraints in the cellular slime molds, 530
- BOUSSY, IAN A. See JERRY A. COYNE
- BRUCE, RICHARD C. Size displacement in salamanders: a criticism of the concept of a developmental constant, 872
- BRYANT, EDWIN H. Reply to Spiess and Dapples, 112
- BRYANT, STEPHEN H. See JERRY A. COYNE
- BULL, J. J. See PAUL H. HARVEY
- BURT, EDWARD H., JR., and A. JOHN GATZ, JR. Color convergence: is it only mimetic?
- CASE, TED J. See MICHAEL E. GILPIN
- CHARLESWORTH, D. On the nature of the self-incompatibility in homomorphic and heteromorphic systems, 732
- CHARNOV, ERIC L. Parent-offspring conflict over reproductive effort, 736
- CHRISTENSEN, SIGURD W. See TODD E. SHELLY
- CLARIDGE, M. F., and M. R. WILSON. Species-area effects for leafhoppers on British trees: comments on the paper by Rey et al., 573
- CONNOR, RICHARD C., and KENNETH S. NORRIS. Are dolphins reciprocal altruists? 358
- COSTANTINO, R. F. See R. A. DESHARNAIS
- COYNE, JERRY A., IAN A. BOUSSY, TIMOTHY PROUT, STEPHEN H. BRYANT, J. S. JONES, and JOHN A. MOORE. Long-distance migration of *Drosophila*, 589
- CRAIG, JOHN L. On the evidence for a "pursuit deterrent" function of alarm signals of swamphens, 753
- CREASE, TERI J. See PAUL D. N. HEBERT
- CZOGHOR, R. J., and K. J. LEONARD. Multiple-niche polymorphism in haploid microorganisms, 292
- DESHARNAIS, R. A., and R. F. COSTANTINO. The approach to equilibrium and the steady-state probability distribution of adult numbers in *Tribolium brevicornis*, 102
- DE VITA, JOSEPH. The broken-stick model: a response to Pielou's critique and some general comments, 576
- DE VITA, JOSEPH, DONALD KELLY, and STANLEY PAYNE. Arthropod encounter rate: a null model based on random motion, 499
- DEWSBURY, DONALD A. Ejaculate cost and male choice, 601
- EBENMAN, BO, and SVEN G. NILSSON. Components of niche width in a territorial bird species: habitat utilization in males and females of the chaffinch (*Fringilla coelebs*) on islands and mainland, 331
- EBERHARD, WILLIAM G. Beetle horn dimorphism: making the best of a bad lot, 420

- EMLÉN, STEPHEN T. The evolution of helping. I. An ecological constraints model, 29
- EMLÉN, STEPHEN T. The evolution of helping. II. The role of behavioral conflict, 40
- ESHEL, ILAN. See MARCUS W. FELDMAN
- FELDMAN, MARCUS W., and ILAN ESHÉL. On the theory of parent-offspring conflict: a two-locus genetic model, 284
- FERRARI, DENISE C. See PAUL D. N. HEBERT
- FOWLER, CHARLES W., and JAMES A. MACMAHON. Selective extinction and speciation: their influence on the structure and functioning of communities and ecosystems, 480
- GATTO, MARINO. Comments on "MacArthur's minimization principle: a footnote," 140
- GATZ, JOHN, JR. See EDWARD H. BURTT, JR.
- GIESEL, JAMES T., PATRICIA A. MURPHY, and MICHAEL N. MANLOVE. The influence of temperature on genetic interrelationships of life history traits in a population of *Drosophila melanogaster*: what tangled data sets we weave, 464
- GILLESPIE, JOHN H. See MICHAEL TURELLI
- GILLIAM, JAMES F., RICHARD F. GREEN, and NOLAN E. PEARSON. The fallacy of the traffic policeman: a response to Templeton and Lawlor, 875
- GILPIN, MICHAEL E., TED J. CASE, and EDWARD A. BENDER. Counterintuitive oscillations in systems of competition and mutualism, 584
- GIVNISH, THOMAS J. Outcrossing versus ecological constraints in the evolution of dioecy, 849
- GLASSER, JOHN W. On the causes of temporal change in communities: modification of the biotic environment, 375
- GLASSER, JOHN W. A theory of trophic strategies: the evolution of facultative specialists, 250
- GOODMAN, DANIEL. Optimal life histories, optimal notation, and the value of reproductive value, 803
- GREEN, RICHARD F. See JAMES F. GILLIAM
- GROSSMAN, GARY D. Dynamics and organization of a rocky intertidal fish assemblage: the persistence and resilience of taxocene structure, 611
- HARROLD, CHRISTOPHER. Escape responses and prey availability in a kelp forest predator-prey system, 132
- HARTL, D. L. See D. J. HOWELL
- HARVEY, PAUL H., J. J. BULL, MIKE PEMBERTON, and ROBERT J. PAXTON. The evolution of aposematic coloring in distasteful prey: a family model, 710
- HEBERT, PAUL D. N., DENISE C. FERRARI, and TERI J. CREASE. Heterosis in *Daphnia*: a reassessment, 427
- HIXON, MARK A. Energy maximizers and time minimizers: theory and reality, 596
- HOWELL, D. J., and D. L. HARTL. In defense of optimal foraging by bats: a reply to Schluter, 438
- JAEGER, ROBERT G., DEBRA E. BARNARD, and RAYMOND G. JOSEPH. Foraging tactics of a terrestrial salamander: assessing prey density, 885
- JAENIKE, JOHN. Environmental modification of oviposition behavior in *Drosophila*, 784
- JONES, J. S. See JERRY A. COYNE
- JOSEPH, RAYMOND G. See ROBERT G. JAEGER
- KARR, JAMES R. Avian extinction on Barro Colorado Island, Panama: a reassessment, 220
- KAT, PIETER W. The relationship between heterozygosity for enzyme loci and developmental homeostasis in peripheral populations of aquatic bivalves (Unionidae), 824
- KELLY, DONALD. See JOSEPH DE VITA
- KILTIE, RICHARD A. On the significance of menstrual synchrony in closely associated women, 414
- KIRKPATRICK, MARK. Quantum evolution and punctuated equilibria in continuous genetic characters, 833
- KREITMAN, MARTIN. See E. DAVIS PARKER, JR.

- LAWLOR, TIMOTHY E. The evolution of body size in mammals: evidence from insular populations in Mexico, 54
- LEONARD, K. J. See R. J. CZOCHOR
- McCOY, EARL D. See JORGE R. REY
- McINNIS, D. O., H. E. SCHAFER, and L. E. METTLER. Field dispersal and population sizes of native *Drosophila* from North Carolina, 319
- MACK, RICHARD N., and JOHN N. THOMPSON. Evolution in steppe with few large, hooved animals, 757
- MACMAHON, JAMES A. See CHARLES W. FOWLER
- McNAIR, JAMES N. Optimal giving-up times and the marginal value theorem, 511
- MALANSON, GEORGE P. The assembly of hanging gardens: effects of age, area, and location, 145
- MANLOVE, MICHAEL A. See JAMES T. GIESEL
- MENOZZI, PAOLO See ROBERT R. SOKAL
- METCALF, ROBERT A. See ROBERT E. PAGE, JR.
- METTLER, L. E. See D. O. McINNIS
- MOORE, JOHN A. See JERRY A. COYNE
- MURPHY, PATRICIA A. See JAMES T. Giesel
- NILSSON, SVEN G. See BO EBENMAN
- NORRIS, KENNETH S. See RICHARD C. CONNOR
- NOVELLIE, PETER. See NORMAN OWEN-SMITH
- ORIAN, G. H. See NATHANIEL T. WHEELWRIGHT
- OWEN-SMITH, NORMAN, and PETER NOVELLIE. What should a clever ungulate eat? 151
- PAGE, ROBERT E., JR., and ROBERT A. METCALF. Multiple mating, sperm utilization, and social evolution, 263
- PAMILO, PEKKA. Genetic evolution of sex ratios in eusocial Hymenoptera: allele frequency simulations, 638
- PARK, MYOUNG H. See PETER E. SMOUSE
- PARKER, E. DAVIS, JR., and MARTIN KREITMAN. On the relationship between heterozygosity and DNA content, 749
- PATTEN, BERNARD C. Environs: relativistic elementary particles for ecology, 179
- PAXTON, ROBERT J. See PAUL J. HARVEY
- PAYNE, STANLEY. See JOSEPH DE VITA
- PEARSON, NOLAN E. See JAMES F. GILLIAM
- PEMBERTON, MIKE. See PAUL H. HARVEY
- PIEROTTI, RAYMOND. Spite, altruism, and semantics: a reply to Waltz, 116
- POWELL, ROGER A. Evolution of black-tipped tails in weasels: predator confusion, 126
- PROUT, TIMOTHY. See JERRY A. COYNE
- RAND, A. STANLEY. See MICHAEL J. RYAN
- REY, JORGE R., DONALD R. STRONG, JR., and EARL D. McCOY. On overinterpretation of the species-area relationship, 741
- RIEBESELL, JOHN F. Arctic-alpine plants on mountaintops: agreement with island biogeography theory, 657
- ROSS, M. D. Five evolutionary pathways to subdioecy, 297
- RUSSELL, ELEANOR M. Parental investment and desertion of young in marsupials, 744
- RYAN, MICHAEL J., MERLIN D. TUTTLE, and A. STANLEY RAND. Bat predation and sexual advertisement in a Neotropical anuran, 136
- SAFRIEL, URIEL N. See YORAM AYAL
- SCHAFER, H. E. See D. O. McINNIS
- SCHLUTER, DOLPH. Optimal foraging in bats: some comments, 121
- SCHOENER, THOMAS W. See MICHAEL TURELLI
- SHELLY, TODD E., and SIGURD W. CHRISTENSEN. Testing for competition: a critique of De Vita's use of the broken-stick model, 435
- SINGER, MICHAEL C. Sexual selection for small size in male butterflies, 440
- SMOUSE, PETER E., RICHARD S. SPIELMAN, and MYOUNG H. PARK. Multiple-locus allocation of individuals to groups as a function of the genetic variation within and differences among human populations, 445
- SOKAL, ROBERT R., and PAOLO MENOZZI. Spatial autocorrelations of HLA frequencies in Europe support demic diffusion of early farmers, 1

- SPIELMAN, RICHARD S. See PETER E. SMOUSE
- SPIESS, ELIOT B. Do female flies choose their mates? 675
- STRATHMANN, M. F. See R. R. STRATHMANN
- STRATHMANN, R. R., and M. F. STRATHMANN. The relationship between adult size and brooding in marine invertebrates, 91
- STRONG, DONALD R., JR. See JORGE R. REY
- THOMPSON, JOHN N. See RICHARD N. MACK
- TRENDALL, JASPER T. Covariation of life history traits in the mosquitofish, *Gambusia affinis*, 774
- TURELLI, MICHAEL, JOHN H. GILLESPIE, and THOMAS W. SCHOENER. The fallacy of the fallacy of the averages in ecological optimization theory, 879
- TUTTLE, MERLIN D. See MICHAEL J. RYAN
- VITOUSEK, PETER. Nutrient cycling and nutrient use efficiency, 553
- WALTZ, EDWARD C. Resource characteristics and the evolution of information centers, 73
- WASSER, SAMUEL K. Reciprocity and the trade-off between associate quality and relatedness, 720
- WATSON, JOHN S. Parental manipulation of the sex ratio of offspring: a historical note, 282
- WHEELWRIGHT, NATHANIEL T., and GORDON H. ORIAN. Seed dispersal by animals: contrasts with pollen dispersal, problems of terminology, and constraints on coevolution, 402
- WILLSON, MARY F. Sexual selection and dicliny in angiosperms, 579
- WILSON, M. R. See M. F. CLARIDGE
- WRIGHT, S. JOSEPH, and CARL C. BIEHL. Island biogeographic distributions: testing for random, regular, and aggregated patterns of species occurrence, 345

## Alphabetical Table of Contents of Titles

- The approach to equilibrium and the steady-state probability distribution of adult numbers in *Tribolium brevicornis*. R. A. Desharnais and R. F. Costantino, 102
- Arctic-alpine plants on mountaintops: agreement with island biogeography theory. John F. Riebesell, 657
- Are dolphins reciprocal altruists? Richard C. Connor and Kenneth S. Norris, 358
- Arthropod encounter rate: a null model based on random motion. Joseph De Vita, Donald Kelly, and Stanley Payne, 499
- The assembly of hanging gardens: effects of age, area, and location. George P. Malanson, 145
- Avian extinction on Barro Colorado Island, Panama: a reassessment. James R. Karr, 220
- Bat predation and sexual advertisement in a Neotropical anuran. Michael J. Ryan, Merlin D. Tuttle, and A. Stanley Rand, 136
- Beetle horn dimorphism: making the best of a bad lot. William G. Eberhard, 420
- Belowground herbivory: the adaptive geometry of geomyid burrows. Douglas C. Andersen, 18
- The broken-stick model: a response to Pielou's critique and some general comments. Joseph De Vita, 576
- Color convergence: is it only mimetic? Edward H. Burtt, Jr., and A. John Gatz, Jr., 738
- Comments on "MacArthur's minimization principle: a footnote." Marino Gatto, 140
- Complexity, stability, and functional response. Peter A. Abrams and Taber D. Allison, 240
- Components of niche width in a territorial bird species: habitat utilization in males and females of the chaffinch (*Fringilla coelebs*) on islands and mainland. Bo Ebenman and Sven G. Nilsson, 331
- Counterintuitive oscillations in systems of competition and mutualism. Michael E. Gilpin, Ted J. Case, and Edward A. Bender, 584
- Covariation of life history traits in the mosquitofish, *Gambusia affinis*. Jasper T. Trendall, 774
- Do female flies choose their mates? Eliot B. Spiess, 675
- Dynamics and organization of a rocky intertidal fish assemblage: the persistence and resilience of taxocene structure. Gary D. Grossman, 611
- Ejaculate cost and male choice. Donald A. Dewsbury, 608
- Energy maximizers and time minimizers: theory and reality. Mark A. Hixon, 596
- Environmental modification of oviposition behavior in *Drosophila*. John Jaenike, 784
- Environ's: relativistic elementary particles for ecology. Bernard C. Patten, 179
- Escape responses and prey availability in a kelp forest predator-prey system. Christopher Harrold, 132
- Evolutionary strategies and developmental constraints in the cellular slime molds. J. T. Bonner, 530
- Evolution in steppe with few large, hooved mammals. Richard N. Mack and John N. Thompson, 757
- The evolution of aposematic coloration in distasteful prey: a family model. Paul H. Harvey, J. J. Bull, Mike Pemberton, and Robert J. Paxton, 710
- Evolution of black-tipped tails in weasels: predator confusion. Roger A. Powell, 126
- The evolution of body size in mammals: evidence from insular populations in Mexico. Timothy E. Lawlor, 54
- The evolution of helping. I. An ecological constraints model. Stephen T. Emlen, 29
- The evolution of helping. II. The role of

- behavioral conflict. Stephen T. Emlen, 40
- The fallacy of the fallacy of the averages in ecological optimization theory. Michael Turelli, John H. Gillespie, and Thomas W. Schoener, 879
- The fallacy of the traffic policeman: a response to Templeton and Lawlor. James F. Gilliam, Richard F. Green, and Nolan E. Pearson, 875
- Field dispersal and population sizes of native *Drosophila* from North Carolina. D. O. McInnis, H. E. Schaffer, and L. E. Mettler, 319
- Five evolutionary pathways to subdioecy. M. D. Ross, 297
- Foraging tactics of a terrestrial salamander: assessing prey density. Robert G. Jaeger, Debra E. Barnard, and Raymond G. Joseph, 885
- Genetic evolution of sex ratios in eusocial Hymenoptera: allele frequency simulations. Pekka Pamilo, 638
- Heterosis in *Daphnia*: a reassessment. Paul D. N. Hebert, Denise C. Ferrari, and Teri J. Crease, 427
- In defense of optimal foraging by bats: a reply to Schluter. D. J. Howell and D. L. Hartl, 438
- The influence of temperature on genetic interrelationships of life history traits in a population of *Drosophila melanogaster*: what tangled data sets we weave. James T. Giesel, Patricia A. Murphy, and Michael N. Manlove, 464
- Island biogeographic distributions: testing for random, regular, and aggregated patterns of species occurrence. S. Joseph Wright and Carl C. Biehl, 345
- Long-distance migration of *Drosophila*. Jerry A. Coyne, Ian A. Boussy, Timothy Prout, Stephen H. Bryant, J. S. Jones, and John A. Moore, 589
- Multiple-locus allocation of individuals to groups as a function of the genetic variation within and differences among human populations. Peter E. Smouse, Richard S. Spielman, and Myoung H. Park, 445
- Multiple mating, sperm utilization, and social evolution. Robert E. Page, Jr. and Robert A. Metcalf, 263
- Multiple-niche polymorphism in haploid microorganisms. R. J. Czychor and K. J. Leonard, 292
- Nutrient cycling and nutrient use efficiency. Peter Vitousek, 553
- On overinterpretation of the species-area relationship. Jorge R. Rey, Donald R. Strong, Jr., and Earl D. McCoy, 741
- On the causes of temporal change in communities: modification of the biotic environment. John W. Glasser, 375
- On the evidence for a "pursuit deterrent" function of alarm signals of swamp-hens. John L. Craig, 753
- On the nature of the self-incompatibility locus in homomorphic and heteromorphic systems. D. Charlesworth, 732
- On the relationship between heterozygosity and DNA content. E. Davis Parker, Jr. and Martin Kreitman, 749
- On the significance of menstrual synchrony in closely associated women. Richard A. Kiltie, 414
- On the theory of parent-offspring conflict: a two-locus genetic model. Marcus W. Feldman and Ilan Eshel, 284
- Optimal foraging in bats: some comments. Dolph Schluter, 121
- Optimal giving-up times and the marginal value theorem. James N. McNair, 511
- Optimal life histories, optimal notation, and the value of reproductive value. Daniel Goodman, 803
- Outcrossing and the incidence of dioecism on island floras. K. S. Bawa, 866
- Outcrossing versus ecological constraints in the evolution of dioecy. Thomas J. Givnish, 849
- Parental investment and desertion of young in marsupials. Eleanor M. Russell, 744
- Parental manipulation of the sex ratio of offspring: a historical note. John S. Watson, 282
- Parent-offspring conflict over reproductive effort. Eric L. Charnov, 736
- Paternity and fruit production in trumpet creeper (*Campis radicans*). Robert I. Bertin, 694

- Quantum evolution and punctuated equilibria in continuous genetic characters. Mark Kirkpatrick, 833
- Reciprocity and the trade-off between associate quality and relatedness. Samuel K. Wasser, 720
- r*-curves and the cost of the planktonic stage. Yoram Ayal and Uriel N. Safriel, 391
- The relationship between adult size and brooding in marine invertebrates. R. R. Strathmann and M. F. Strathmann, 91
- The relationship between heterozygosity for enzyme loci and developmental homeostasis in peripheral populations of aquatic bivalves (Unionidae). Pieter W. Kat, 824
- Reply to Spiess and Dapples. Edwin H. Bryant, 112
- Resource characteristics and the evolution of information centers. Edward C. Waltz, 73
- Seed dispersal by animals: contrasts with pollen dispersal, problems of terminology, and constraints on coevolution. Nathaniel T. Wheelwright and Gordon H. Orians, 402
- Selective extinction and speciation: their influence on the structure and functioning of communities and ecosystems. Charles W. Fowler and James A. MacMahon, 480
- Sexual selection and decline in angiosperms. Mary F. Willson, 579
- Sexual selection for small size in male butterflies. Michael C. Singer, 440
- Size displacement in salamanders: a criticism of the concept of a developmental constant. Richard C. Bruce, 872
- Spatial autocorrelations of HLA frequencies in Europe support demic diffusion of early farmers. Robert R. Sokal and Paolo Menozzi, 1
- Species-area effects for leafhoppers on British trees: comments on the paper by Rey et al. M. F. Claridge and M. R. Wilson, 573
- Spite, altruism, and semantics: a reply to Waltz. Raymond Pierotti, 116
- Testing for competition: a critique of De Vita's use of the broken-stick model. Todd E. Shelly and Sigurd W. Christensen, 435
- A theory of trophic strategies: the evolution of facultative specialists. John W. Glasser, 250
- What should a clever ungulate eat? Norman Owen-Smith and Peter Novellie, 151
